

# Recreation Center Playground Shade Structure

## What is Happening at the Recreation Center Playground?

The City of Durango Parks and Recreation Department is making improvements to the playground facility at the Recreation Center. This project involves the installation of a shade structure over the playground facility. The post and frame of the structure will be installed this fall with the shade fabric being installed in the spring.

The Recreation Center playground will be closed from Monday, November 27th to Friday, December 8th for the installation of the shade structure's post and framing.

Thank you for your patience. Additions to the playground area are scheduled to be complete by December 8, 2017.
